

MSK

Delegates are asked to reflect on the question and write their thoughts on the post-it notes provided and place them on the flip-chart paper on the table. These were collected and the responses are outlined below in themes

Question

“What influences patient choice and therefore what information would people want in making a choice as to where they receive treatment?”

MSK ranked ideas for choice

Quality

Good quality treatment x 3

Clinical excellence

Facility ratings

Early intervention

Where will I get the best treatment?

Survival prospects/return to motorcycling

Best use of existing services and venues

Accessibility

Accessible treatment

Access (transport availability)

Waiting time x2

Date of procedure/appointment time

Speed of appointment

Close to home

Somewhere within an hour car travel or an easy way of getting there

Access to treatment centre by bus etc.

Geographical ease of access including transport

Other

Holistic element to service (links to multidisciplinary support/services)
